

7th Annual Conference

Complimentary Contributions of Tobacco Control and Regulatory Science Research

October 10-11, 2019

Burlington Hilton Hotel, Burlington, Vermont

The 7th Annual VCBH Conference will focus on the intersection between **tobacco regulatory science and tobacco control**, two of the major fields in tobacco research. We will bring together renowned researchers in both fields to see how each may compliment one another to decrease tobacco use nationwide.

This year's keynote speaker is **Dorothy Hatsukami, Ph.D.**, Forster Family Chair in Cancer Prevention at the Masonic Cancer Center and Professor of Psychiatry at the University of Minnesota. Dr. Hatsukami's areas of expertise include nicotine addiction and its treatment, including testing medications such as nicotine vaccine and combination medications, in smokers.

We are also announcing the **call for poster abstracts** focused on *research related to tobacco regulatory science or tobacco control*. Abstracts will be evaluated on the basis of scientific merit. Please send submissions (including title, authors, affiliations, and 250-word abstract) to Diann Gaalema at diann.gaalema@med.uvm.edu by **August 15**.

For conference program, registration and hotel links, please visit our [conference webpage](#).
